## ABOUT ME

I am a Software engineer. I've gained fundamental knowledge of software design and development and worked on projects. I'd love to combine my skills in Software engineering with my passion for creating things and solving problems around.

## EXPERIENCE

### ALX AFRICA - Software Engineering Intern

MAY 2022 - PRESENT

- I employ best coding practices on my different software development projects
- Employed the skills gained here to build lots of projects
- Worked on a lot of tasks assigned almost everyday

### Reskill Americans, US - Front End Development Tutor

OCTOBER 2022 - DECEMBER 2022

- I make resources including videos and articles for students to read or watch.
- I help with any problem or issue they have and have regular virtual classes to check on them.

### Zuri Team Inc., Nigeria - Full Stack Development Intern

MAY 2022 - JULY 2022

- Learnt backend development with django
- Cooperated with my team of 15 to build a Metadata extraction web app
- Created and linked the Django Templates

## PROJECTS

**Serverless Todo App** - A simple TODO application using AWS Lambda and Serverless framework

TechStack - AWS Lambda, Serverless, Auth0, TypeScript

### Converted a Monolith App to Microservices

TechStack: TypeScript, Docker, Travis Ci pipeline, Kubernetes

**Simple Shell** - A simple shell to replicate some of the functions of the Bourne shell (sh) on a unix operating system.

TechStack: C

**Xtracto** - A metadata extraction web application

## TECHNICAL SKILLS

HTML5  
CSS3, Bootstrap
